

License Statistics of 600-Series and 9x515 Items

The license applications for items in the 18 categories of the United States Munitions List (USML) showed an overall average decline of 51.7% from 4,811 to 2,323 per month through June 30, 2018. The average monthly drop of 2,488 in license applications is the result of certain items that do not warrant control on the USML transitioning to the Commerce Control List (CCL). The biggest drop in license applications was those impacted by the Fourth regulatory change involving the transition of satellites with a 85.4% decline. The Directorate of Defense Trade Controls (DDTC) of the U.S. Department of State estimates a 45% decline in license applications will be shown when all USML categories have been reviewed.

¹ Note: This number for the total applications is slightly smaller than the sum of all applications by each rule because license applications containing multiple ECCNs may be associated with more than one regulatory change. For instance, a single application containing 9A610 and 0A606 items would be counted in both the 1st rule column and the 2nd rule column.
